### FAMILY PHYSICIAN

The Victoria Community Health Centre (VCHC) is a vibrant emerging community health centre in the heart of Cook Street Village currently serving unattached patients with Nursing Services and Virtual Care visits. The VCHC is a Patient Medical Home, operated by Creating Community Wellness Society (CCWS), a Victoria registered charity. VCHC is proud to serve a catchment area in Central Victoria with having one of the largest rates of unattached patients. We are focused on providing services through an integrated care model.

Recent allotments from the Ministry of Health enable us to seek up to 2 FTE physicians. With a minimum of 1 day/week required, we look forward to working with you to ensure continuity of care, primarily for our seniors and complex care patients. We welcome solo or a group of practitioners at any stage of practice willing to attach patients and be part of the VCHC team.

What we can offer you:

- Flexible hours and days (M-F)
- A choice of contract models
- Competitive rates for overhead
- Equipped clinic rooms
- OSCAR EMR and personnel
- Administrative Support
- Nursing support as required
- Virtual visit technology with or without Nursing support

When the primary care practitioners are secured, working with you and the CHC Director we will add services to meet the needs of our population.

We understand the importance of work-life balance for family practice physicians. We want that for all who are involved – staff, contractors, our board and all we serve. Our vision is to have a cluster of practitioners who want to provide this care using flexible schedules, models, combining in person and virtual visits, using the infrastructure and personnel provided to support and enhance your practice. We support patients by supporting you.

The minimum requirements are:

- One day per week
- Open or partially open panel
- Willingness to work in an integrated care environment
- Agreement on a Medical Director
- Working as a cohesive and enthusiastic team to support our patients

**Please contact Kim at 778-678-7488 with any questions**
